Even though there are workflows on the following slides

I could not find a BE orchestration example besides

the classical one for authentication.

In any case we can consider this,

but since it was the same as the on the slide I simply added the

workflows themselves

Get valid token

	Resources	Requests	Resources
POST	/token	email, password	auth_token
GET	/user/{token_id}	auth_token,	user_info_output
DELETE	/token/{user_id}	auth_token,	

Create and update News

	Resources	Requests	Resources
POST	/new	auth_token, new_info	
PUT	/new/{id}	auth_token,	
GET	/new	auth_token,	[new_info]
GET	/new/{id}	auth_token,	new_info

Create product on new market

	Resources	Requests	Resources
POST	/market	auth_token, market_info	
GET	/market		[market_info]
GET	/type		[type_info]
POST	/product	auth_token, product_info_input	
GET	/product		[product_info_output]
GET	/product/{id}		product_info_output

Add product to favorite

	Resources	Requests	Resources
GET	/market		[market_info]
GET	/market/{id}		market_info
GET	/type		[type_info]
GET	/product/type/{type_id}		[product_info_output]
PUT	/favorite/{market_id}	auth_token,
